

Truck Cranes

Why Guess Your Load When You Can Use Our Telemetry Weight Indicator

SAFETY COMES FIRST ALWAYS KNOW YOUR LOAD

If you don't know your load, then what are you lifting? Our Load Cell System has been specially designed for Truck Mounted Cranes, to protect the operator and the Crane from damage.

Our design is rugged but user friendly. The Load Pin which is installed in the knuckle joint at the end of the boom, is Radio Controlled back to the Operator's Display.

No license is required as the system is low powered.
